 Portfolio

Skills

HTML5, CSS3, JavaScript, TypeScript, Angular, Angular Material, Tailwind CSS, Bootstrap, jQuery, NgRx, RxJS, SPA, REST API's Integration, GraphQL, Figma, Figma Design to Code, User Interface (UI) Design, User Experience (UX) Design, Responsiveness, Jasmine + Karma (Basic), PrimeNG, Accessibility, Wireframing & Prototyping, Design System, Usability Testing, Chrome Dev Tools, Code Quality, GitHub, Git, Postman, Agile, Azure DevOps, Docker, Scalability, Performance Optimization and Debugging, Problem Solving, Cross-Functional Collaboration, and Time Management.

Experience

Infosys, Bengaluru

Jan 2025 - Present

Role: Senior Systems Engineer

Contributed to the end-to-end **UI/UX modernization** of a **large-scale ERP web application** in the **Manufacturing Domain**. The ERP platform supports modules such as Requisition Management, Database Utilities, report management, user access control, and administrative configuration, helping **streamline inter-departmental operations globally**.

- Redesigned major **ERP modules (Requisition, Reports, User Access, Database Utilities)** using Figma, reducing user confusion and training time by 30%.
- Rebuilt frontend with Angular, TypeScript, HTML5, CSS3, Bootstrap, PrimeNG, delivering **modular and responsive components**.
- Integrated GraphQL & REST APIs for **dynamic report generation**; used RxJS and NgRx for **state and stream management**.
- Developed advanced Reactive Forms with **dynamic validation for requisition and admin modules**.
- Applied lazy loading & OnPush change detection, cutting **load times in reports and user access modules**.
- Implemented role-based routing & route guards for **secure admin access**.
- Enabled multi-region (CA/US), multi-language (i18n), and **ARIA accessibility compliance**.
- Performed **manual testing** and supported Jasmine/Karma component testing for **UI stability**.
- Improved task efficiency by **25%** and reduced UI-related support requests by **30%** through **usability, performance, and structure optimization**.

Infosys, Bengaluru

Aug 2022 - Dec 2024

Role: Systems Engineer

A frontend modernization project for a **Lab Management System** used by scientists and researchers to **manage lab operations, instruments, and data**. The goal was to improve **UI responsiveness, user experience, and overall usability for efficient lab workflows**.

- Developed **responsive frontend** screens using Angular, JavaScript, HTML5, CSS, Angular Material.
- Converted Figma designs into **clean, reusable Angular components**.
- And also Integrated REST APIs for **real-time dashboards and forms**.
- Optimized UI performance with **change detection and component tuning**.
- Ensured **responsiveness, accessibility, and cross-browser compatibility**.
- Delivered features in **Agile Scrum collaboration with cross-functional teams**.

Projects

Investment Tracker

Present | [Link](#)

- Currently designing and developing the Investment Tracker to **simplify transactions** with **85%** reduced time and **enhance portfolio tracking** accuracy by **50%**.
- Working on the **Tax Filing Assistant** to automate **70%** of **data entry** and **generate tax reports** in under **2 minutes**, reducing effort by **60%**.
- Both modules focus on responsive design and user-friendly navigation for efficient user experiences.

Education Details

Jawaharlal Nehru Technological University, Anantapur

Jul 2018 - Aug 2022

Bachelor of Technology in Electronics and Communication Engineering - 78%

Relevant Coursework: HTML, CSS, JavaScript, Adaptive Design and Responsive Design

Certifications

- Google UX Design Professional
- Infosys Certified Angular Professional
- Infosys Certified JavaScript Developer & TypeScript Developer
- Responsive Web Design by Free code camp
